	What have you accomplished since last scrum?	Are there any obstacles in the way of meeting your goal?	What will you accomplish before the next meeting?
Nick	I have worked on writing tests for the radius search function.	The main obstacle is finding time to meet with group members to consolidate out code	By the next meeting, I hope to get the radius search functionality working with the front-end.
Tong	I have worked on the css for the restaurant and recipe pages	My eclipse constantly crashes so I can't work on my code 80% of the time.	Work on Cucumber tests for front end.
Chris	Kevin and I have been working on IHLogin as a servlet. We are done writing the code, and we just need to test it at this point.	Wifi is down. Cannot connect to the network.	We just need to keep testing our code.
Aahad	I have worked on the login and sign-up form for the front end, and I have tried to integrate it with the backend.	Cannot connect to the network.	Start Cucumber tests and continue fixing the aesthetic of the pages.
Kevin	We wrote the IHLogin servlet, and implemented SQL functionality for adding items to lists as they are searched and managed lists.	Wifi is down. JDBC needs to be tested.	Fix JDBC issues, test our code.
